

STANFORD UNIVERSITY  
STANFORD, CALIFORNIA

DEPARTMENT OF BIOLOGICAL SCIENCES

Mar 6

Dear Jack:

Some additional complications and probabilities have come up which will almost certainly affect our tentative plans. At the moment, confidentially, I'll have the responsibility of taking over the ~~the~~ to be established Biochem. Dept here in Med School (and grad. school). This will probably

make it necessary that  
I start work in this  
room, possibly with  
more and fairly comprehensive  
trips and surveys of  
other schools - Possibly  
then, being away much  
or most of Spring quarter -  
It would appear then,  
best to postpone our  
collaboration until it  
can be done right!  
Comments?

Our N.E.F. meets  
in Atlanta on 18, 19, 20.  
I will be in Wash -  
(~~through~~ Roger Smith, & NRC)  
from pm 14 until am 18  
Hurdle, Ed
